

International Journal of Engineering and Technology

CONTENTS

Volume 10, Number 5, October 2018

• Concrete Design and Performance Analysis

Dynamic Analysis of Innovative Hybrid Wind Mill Tower with Soil Structure Interaction.....380

Hemal J. Shah and Atul K. Desai

Volumetric Optimization and Moisture Sensitivity Analysis of Crumb Modified Stone Mastic Asphalt.....386

Hasnain Gardezi and Arshad Hussain

Binder Contribution to Cracking of a Lightly Trafficked Asphalt Pavement Made with Clear Binder.....390

Khalid. Al-Shamsi and Hossam F. Hassan

Suitability of Metakaolin in Concrete.....394

Sonal Shah and S. N. Desai

• Structural Design and Engineering

Investigations of Structural Behavior According to Frame Shape Variation of Electric Transmission Tower...398

Woo Bum Kim

Optimum Design of Reinforced Concrete Multi-Story Multi-Span Frame Structures under Static Loads.....403

Serdar Ulusoy, Aylin Ece Kayabekir, Gebrail Bekdas, and Sinan Melih Nigdeli

• Geological Engineering

Effect of Low temperature Induction on Heat Mining Performance of EGS in Hot Dry Rocks.....408

Wei Zhang, Zhan-qing Qu, and Tian-kui Guo

Physical Damages Effect on Residential Houses Caused by the Earthquake at Ranau, Sabah Malaysia.....414

Muhamad Azry Khoiry, Noraini Hamzah, Siti Aminah Osman, Azrul A. Mutalib and Roszilah Hamid

• Urban Landscape Design and Construction

A Study of Tree Pattern and Tree species of Colonial Grid Pattern City in Tropical Zone Considering Urban Morphology Using Statistical Analysis.....419

Khaing Myint Mo and Mishima Nobuo

An Analysis on Illumination Distribution and Residents' Perception in a Traditional Town for Streetlight Planning.....425

Raheon Min, Nobuo Mishima, and Takayuki Fuchikami

Morphological Researchon Compact University Campus: Taking the case of Dushu Lake Higher Education Town

.....430

Yezi Dai
